

Moticam 353

Cost-effective gooseneck camera for microscopy, demonstration and documentation use.

Description

The Moticam 353 contains a cost-effective 1/4" imaging chip that delivers clear and sharp live images to your computer screen.

Thanks to its gooseneck style construction with a heavy and sturdy base, the camera can be moved into any position for documentation or a classroom demonstration of any chemistry, physics or biology experiment.

Link the camera to any microscope with one of the 4 microscope adapters provided and instantly turn any scope into a Digital Microscope.

Motic's powerful imaging software is included in this package. Motic Images Plus 2.0 comes versions for Windows as well as Macintosh OSX making this an even more flexible package.

Moticam 353
