

- Indoor installation
- Sheet steel construction
- Epoxypolyester painted
- Key lock

AVTPSC housing have been designed for surveillance applications in places highly exposed to vandalism (underground parking lots, subway stations, prisons, police stations, corridors, supermarkets, etc).

AVTPSC is made of sheet steel (1,5 mm thick) and painted with epoxypolyester powder.

The housing is equipped with an internal bracket for the camera attachment and adjustment.

The compass opening allows ease installation and maintenance. A 4 mm thick PMMA glass is fixed on the front.

The cable outlet is made possible from the fixing base, from both sides (left or right) and from the 2 M20 cable glands on the back side. AVTPSC can eventually be equipped with heater and camera power supply.
