

FIRE-GROUND SOLUTION

Video applications

domo have partnered with the Avon Fire & Rescue Service and Stryker Communications Ltd to design and develop a new critical technology solution for improved incident management of fires.

The Fire-Ground Solution provides vital situational awareness information for command personnel, reducing the need for firefighters to describe the scene and significantly improving health and safety. Utilising domo's latest digital 'non line of sight' (NLOS) video transmission technology, the system typically comprises four rapidly deployable video cameras with self-contained power supplies, and can be attached to standard street furniture or mounted on top of an elevated fire platform.

A command vehicle controls camera functions via a domo digital telemetry system, whilst making available four camera feeds to the on scene commander and also distribute these via a satellite up-link to the Fire Service Headquarters. In addition the system can work with a combination of rapid deployed PTZ and mobile body worn cameras.

- Colour, low light and thermal camera compatibility
- Improved health and safety
- More detailed post-incident analysis
- Range 2-5km (dependent on environment and antenna height)
- Quad receiver with 4 PTZ cameras
- Robust and waterproof construction
- domo's unique ultra narrowband system enabling operation inside licence-exempt frequencies.

Products are available to security users only, in licensed frequency bands. These products are not approved for use by unlicensed users. Commercial products are available to unlicensed users - contact domo direct for details.

domo

domo is at the forefront of innovation, developing technologies in the fields of digital wireless, video, audio, telemetry and IP.

Our key technology expertise is in digital video processing, digital modulation and Internet Protocol (IP) interfacing.

Our strength is in adapting complex technologies into simple-to-operate, robust solutions.

Our team of dedicated **domo** engineers is continually developing new solutions directed by demanding customer requirements in fields such as:

- Police Forces
- Security Services
- Special Forces
- Homeland Security Agencies
- First Responders
- Fire Services
- Port Security
- Traffic Management Agencies.
